European Power & Renewables Deals Half year M&A outlook of pwc

The trend towards deals for European gas networks has become strongly evident in the first half of 2013. It's a development that we predicted in earlier reports in this series and that is set to continue. Renewables deal activity has also stepped up and we now expect attention to turn to potential value in gas generation assets. Despite the current economic challenges, gas assets remain an attractive long-term investment opportunity.
